

## planning the urban forest ecology economy and community development

Mon, 28 Jan 2019 07:56:00 GMT planning the urban forest ecology pdf - Urban forests act as green infrastructure that conserves natural ecosystems and sustains clean air and water. They reduce stormwater runoff, cool the urban heat island, reduce air pollution, and provide wildlife habitat. Communities can offset the ecological impact of land development by utilizing the urban forest's natural capacity to mitigate environmental impacts. Urban forests also provide social and health benefits for individuals, as well as economic benefits for communities.
